Analytical thinker with strong communication skills with a drive to build software. I hope to be part of developing software that can solve problems and help create new technologies.

EDUCATION

- Bachelor of technology in Computer Science.**
Vignan's Institute of Information Technology,
Visakhapatnam
07/2019 - Present

PERSONAL PROJECTS

- Bus-Track**
 - <https://github.com/TarunHoKage7/BusTrack>
 - Bus-Track is a transport tracking system. It is a website that can track your bus in real-time.
- Communication with people suffering from speech/hearing problems.
 - We have attempted to create a website that would help people with hearing/speech issues to communicate seamlessly with everybody.
- Upskilling and networking application(Flutter).
 - <https://github.com/TarunHoKage7/worksy>. This is my project for Google Solution Challenge 2021

WORK EXPERIENCE/INTERNSHIP

- Public speaker**
ACM VIIT Chapter
11/2021 - Present
 - Achievements/Tasks
 - Hosted a few workshops and hour of code in my college chapter
- Machine Learning Intern**
Verzeo
04/2021 - 05/2021 India
 - Tasks
 - I have worked on a project from zebo.AI in association with verzeo.
 - I have worked on a model to classify & localize different signs of ageing. I was coordinating our team's tasks and have collected and transformed data into forms that are usable in our model.
